EDUCATION

University of California, Los Angeles (UCLA) Expected Jun 2027
B.S. in Statistics and Data Science / B.A. in Business Economics / Minor in Entrepreneurship Los Angeles, CA
GPA: 3.70 / 4.00
De Anza College | Dean's List (7 quarters), ICPC Participant Mar 2025
A.S.T. Mathematics / A.S.T. Computer Science / A.S. Liberal Arts, Science, Math & Engineering Cupertino, CA

LATEST PROJECTS

Household Size Prediction from Purchase Histories | Python, LightGBM, scikit-learn, R 2026

- Reframed a discrete censored target as classification and predicted posterior expected value, beating direct regression on RMSE in a class wide Kaggle competition.
- Built TF-IDF features over raw product titles that far outperformed hand crafted keyword features, and solved ridge regression in dual form for a feature space larger than the sample.
- Stacked seven models into an ensemble that placed in the upper portion of the leaderboard, delivered in R Markdown.

Trend Following Strategy Backtest | Python, pandas, NumPy 2026

github.com/MatinNikoo/momentum-backtest · live report: matinnikoo.github.io/momentum-backtest

- Built a backtester with lookahead bias prevention, transaction costs, and unit tests on 26 years of daily SPY data.
- Split 2000–2017 in sample and 2018–2026 out of sample to test overfitting, cutting volatility to 15.6% from 19.2%.

Aura Desktop Widgets | Python, PyQt6, NumPy, Windows APIs 2026

github.com/MatinNikoo/aura-widgets

- Shipped Windows desktop widgets that pull live playback from the Windows media session API on a background asyncio thread and recolor the interface per track with median cut palette extraction.
- Built a NumPy renderer that shades text and vector art as 3D chrome from height maps and surface normals, and kept idle cost near zero with cached layers, partial repaints, and animation that pauses under fullscreen apps.

EXPERIENCE

Service Desk Technician Intern Jun 2025 – Sep 2025
Edelman Financial Santa Clara, CA

- Resolved hardware, software, and network tickets with a 95% first response rate and cut turnaround 25%.
- Managed system setup, software upgrades, and user accounts for a national wealth management firm.

CIS Tutor & Teaching Assistant Apr 2024 – Aug 2025
De Anza College Cupertino, CA

- Tutored 20+ students per week and served as TA for Python, Data Abstraction and Structures, and x86 Assembly.

Stagehand & A/V Technician Apr 2024 – Present
Live Nation Entertainment Santa Clara, CA

- Coordinated 12+ live productions including Google I/O 2025 with 100% on time execution.

LEADERSHIP

Founder & Vice President, Iranian Association Club | De Anza College Cupertino, CA

- Founded the club and was VP for two years, earning a Leadership Certificate. Also an AI Future Club officer.

TECHNICAL SKILLS

Programming: Python, C++, Java, R, SQL

ML & Data: PyTorch, TensorFlow, scikit-learn, LightGBM, pandas, NumPy, Matplotlib, Jupyter, Colab, Tableau

Tools & Methods: Git/GitHub, VS Code, Object-Oriented Programming, Agile/Scrum

Certifications: Google Data Analytics, IBM Data Analyst, Python (Introduction & Intermediate)
