Education

University of California, Los Angeles | ***Kaggle class competition, 3rd of 23 teams*** Expected Mar 2028
Intended B.S. Statistics and Data Science / B.A. Business Economics / Minor in Entrepreneurship
GPA: 3.57 · **Coursework:** Probability, Mathematical Statistics, Linear Models, Regression, Machine Learning

De Anza College | ***Dean's List (7 quarters), ICPC Pacific Northwest Regional*** Mar 2025
A.S.T. Mathematics / A.S.T. Computer Science / A.S. Liberal Arts, Science, Math and Engineering
Coursework: Multivariable Calculus, Linear Algebra, Differential Equations, Discrete Math, Data Structures

Projects

Skeptic, AI Data Analyst | ***Python, JavaScript, WebGPU*** 2026
getskeptic.pages.dev · open source checks: github.com/MatinNikoo/skeptic-checks

- Building an AI analyst that checks if claims made with data hold up. Private beta fall 2026, public Dec 2026.
- Reruns the math on A/B tests and backtests, catches misleading charts and fact checks reports line by line.
- Wrote its statistics engine from scratch, so every number the AI states is computed, not guessed.
- Building Gosset, my own model, by fine tuning Qwen3 4B with LoRA on 12,000+ worked checks from that engine.
- Runs Gosset offline on the user's GPU in 4 bits so data stays local, with a cloud model for the heavy jobs.

What Gets an App to 100K Installs | ***Python, pandas, scikit-learn*** 2026
github.com/MatinNikoo/play-store-analysis · simulator: matinnikoo.github.io/simulator.html

- Analyzed 2.2M Play Store apps. Ones using ads plus in-app purchases broke out 18x as often as paid apps.
- Trained a model on 2018 launches and tested on 2019 (0.86 AUC), then built a public web simulator from it.

A/B Testing Library | ***Python, SciPy, pytest*** | github.com/MatinNikoo/abkit 2026

- Built a tested library, CLI and browser app for A/B tests with CUPED, Bayesian and always valid sequential tests.
- Simulations showed peeking gave 39% false positives vs 2%. Caught a bad split in the 90K player Cookie Cats test.

Trend Following Backtest | ***Python, pandas, SciPy*** | github.com/MatinNikoo/momentum-backtest 2026

- Backtested the 50/200 day crossover on SPY from scratch, with next day trades, trading costs and unit tests.
- Lost to buy and hold out of sample (0.63 vs 0.79 Sharpe). Only 3 of 89 window pairs beat it, PBO near 0.57.

Experience

Service Desk Technician Intern Jun 2025 to Sep 2025
Edelman Financial *Santa Clara, CA*

- Resolved hardware, software, and network tickets for a national wealth firm, with 95% fixed on first response.
- Cut average turnaround 25% by writing clearer docs and standardizing how we troubleshoot.

CIS Tutor and Teaching Assistant Apr 2024 to Aug 2025
De Anza College *Cupertino, CA*

- TA for Python, Data Abstraction and Structures, and x86 Assembly. Tutored 20+ students a week in programming.

Stagehand and A/V Technician Apr 2024 to Present
Live Nation Entertainment *Santa Clara, CA*

- Work A/V for 12+ live productions, including Google I/O 2025 and a RÜFÜS DU SOL show.

Leadership

Founder and Vice President, Iranian Association Club
De Anza College *Cupertino, CA*

- Grew the club from 0 to 54 members as VP over two years, earning a Leadership Certificate.
- Raised money and teamed up with the Armenian and Middle Eastern clubs. Also an AI Future Club officer.

Technical Skills

Programming: Python, R, SQL, JavaScript, C++, Java · **Tools:** Git, GitHub Actions, pytest, VS Code
ML and Data: scikit-learn, PyTorch, LightGBM, pandas, NumPy, SciPy, Matplotlib, Colab, Tableau, Excel
Statistics: hypothesis testing, Bayesian inference, causal inference, time series, experimental design, resampling
Certifications: Google Data Analytics, IBM Data Analyst · **Languages:** English, Persian
