Latest Projects

What Gets an App to 100K Installs | *Python, pandas, scikit-learn* 2026
github.com/MatinNikoo/play-store-analysis · simulator: matinnikoo.github.io/simulator.html

- Analyzed 2.2M Play Store apps. Ones using ads plus in-app purchases broke out 18x as often as paid apps.
- Trained a model on 2018 launches and tested on 2019 (0.87 AUC). Its top 10% of picks caught 54% of the hits.
- Built a public web simulator from the model that shows a launch's odds and what would raise them.

Household Size Prediction from Purchase Histories | *Python, LightGBM, scikit-learn, R* 2026

- Treated household size as classification and stacked seven models to place 3rd of 23 teams.

Trend Following Strategy Backtest | *Python, pandas, NumPy* 2026
github.com/MatinNikoo/momentum-backtest · live report: matinnikoo.github.io/momentum-backtest

- Built a backtester from scratch with no lookahead bias, trading costs, and unit tests on 26 years of SPY data.
- Lost to buy and hold out of sample (0.63 vs 0.79 Sharpe). An overfitting test (PBO 0.57) showed tuning was luck.

Experience

Service Desk Technician Intern Jun 2025 to Sep 2025
Edelman Financial *Santa Clara, CA*

- Resolved hardware, software, and network tickets for a national wealth firm, with 95% fixed on first response.
- Cut average turnaround 25% by writing clearer docs and standardizing how we troubleshoot.
- Worked directly with employees on new setups, software upgrades, and account issues.

CIS Tutor and Teaching Assistant Apr 2024 to Aug 2025
De Anza College *Cupertino, CA*

- Served as TA for Python, Data Abstraction and Structures, and x86 Assembly.
- Tutored 20+ students a week in programming and data structures, walking them through debugging step by step.
